ASSIGNMENT

ONLINE BOOKING SYSTEM

A Simple Web-Based Ticket Booking Application

Presented by
Lakshmi Priya K

1. Introduction

Online Booking System

The **Online Booking System** is a web-based application developed to simplify the process of booking tickets online. It provides a user-friendly interface where users can enter their personal details, select the type of booking, choose a date, and specify the number of tickets.

The system automatically calculates the total booking amount and displays the booking details after successful submission.

Main Objective:

To provide a simple and convenient online ticket booking process.

To reduce manual booking effort.

To demonstrate the practical use of HTML, CSS, and JavaScript in a real-world application.

2. Technologies Used & Features

HTML– Creates webpage structure, input fields, selection menus, and the booking form.

CSS – Provides layout, colors, spacing, typography, buttons, and a clean interface.

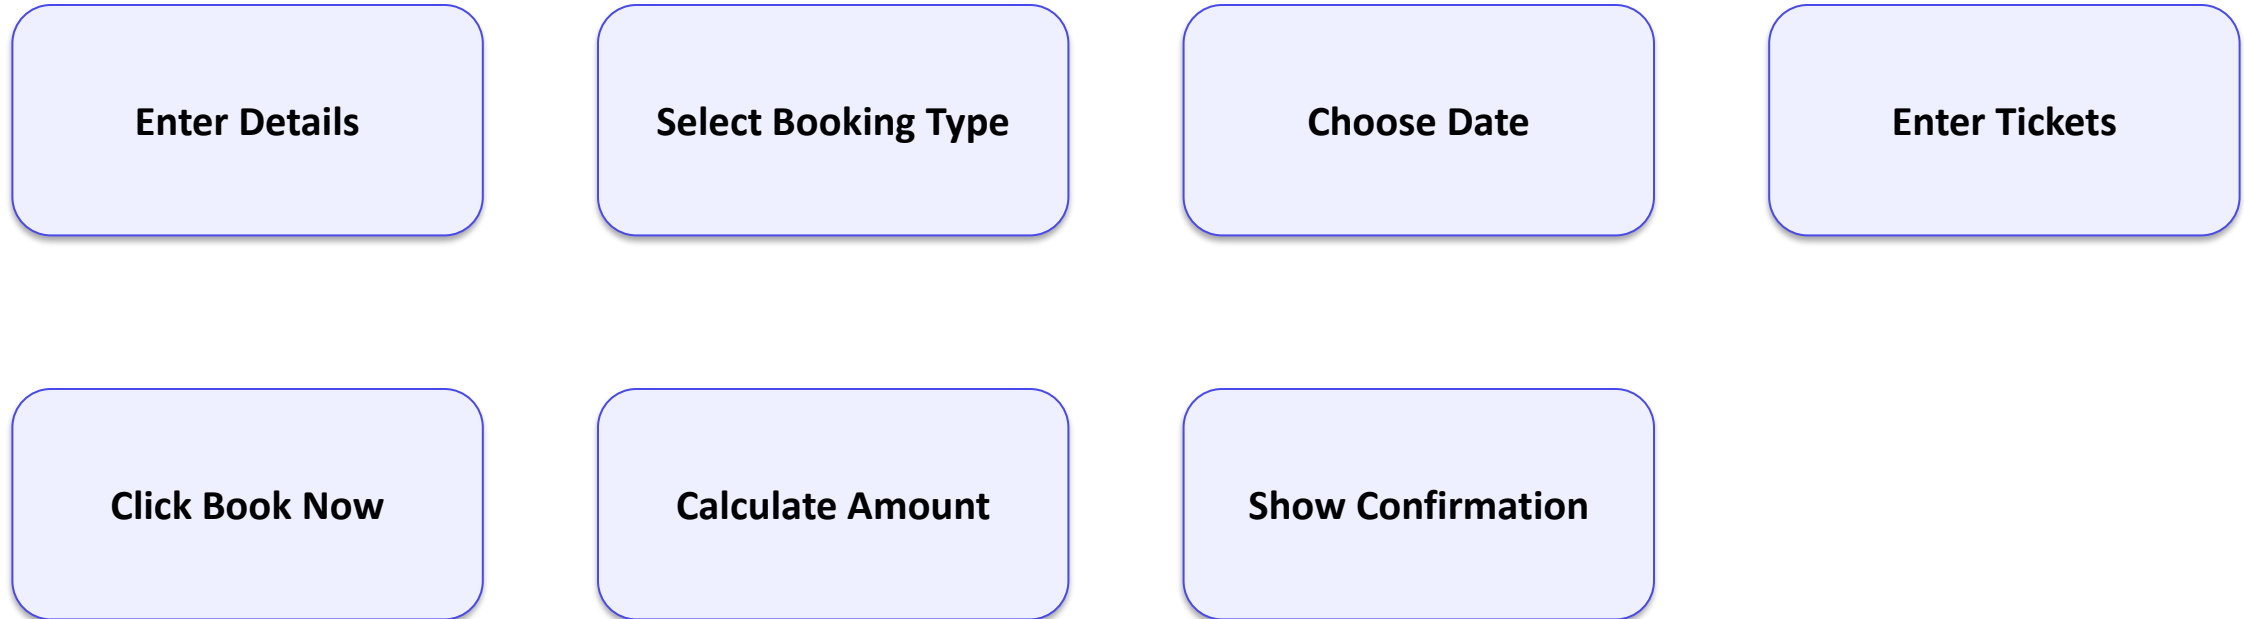

JavaScript – Processes form data, validates inputs, calculates price, and displays confirmation.

Key Features:

- Customer name and email input
- Movie, Concert, or Event selection
- Date and ticket quantity selection
- Automatic price calculation and booking confirmation

3. Working Process

Booking workflow

Total Amount = Number of Tickets × ₹200

5. Future Scope & Conclusion

Future Scope:

Database integration for storing booking records

User registration, login, and authentication

Secure online payment gateway

Seat selection, booking history, and email/SMS notifications

Admin dashboard for managing events and bookings

Conclusion:

The project demonstrates a basic ticket-booking workflow using HTML, CSS, and JavaScript.

It provides a foundation for extending the application into a full-stack booking system.

Project Demonstration

1. Open the Online Booking System in a browser.
2. Enter name and email.
3. Select Movie / Concert / Event.
4. Select the booking date and number of tickets.
5. Click Book Now.
6. Show the calculated total amount and confirmation.
7. Explain the roles of HTML, CSS, and JavaScript.
